filed C.A. Fed
2 December 1960 Incinerators

MEMORANDUM FOR THE RECORD

SUBJECT: Air-Fed Incinerators

1. In the afternoon of 1 December I received the following information from [redacted] regarding the three models of Air-Fed Incinerators.

A. [redacted] requests that we send back all of the original drawings for the Model 1 Incinerator. Upon the receipt of these drawing originals [redacted] will make all of the necessary changes and then return these for our permanent retention. [redacted] has already taken care of the return of the original drawings.

B. Around the middle of March [redacted] will have:

a. One entire Model 2 unit for use with 110V/50-60 cycle current.

b. One bottom for Model 2 unit for use with 208-220-[redacted]V/50-60 cycle/ 3 phase current.

c. Working drawings so bids could be received from potential fabricators.

C. The Model 3 Incinerator will be shipped on 2 December to the [redacted]. This incinerator will then be brought to the building for test and evaluation.
 (TC-92019-61)

2. Should a needarise for Model 2 Incinerators earlier than the date indicated above some other arrangements can be made. The bottom replacement section is being prepared now and the drawings for the 208-220-440 Volt unit will be completed in late January of 1961.

3. The paper grinder (garbage disposer) prototype unit is nearly completed and will be sent in to the [redacted] around the middle of December (TC-82021-61).
